With over 99 pages of memory capacity, the **InfoCenter** is a perfect tool when you have to communicate multiple message in a short time.

The InfoCenter™

FOR THE NEW MILLENNIUM

Pro-Lite® Information Display Technology

Elegant Design

The InfoCenter is one of the most elegant electronic information systems available. Exclusive to Pro-Lite, the elliptical aluminum housing is both attractive and durable. The surface is coated with highly scratch resistant powder paint in a neutral "Anthracite Metallic" color. The impact resistant plexiglass screen is also anti-glare. The InfoCenter comes as a stand alone or wall mounted unit.

Curved Surface

The InfoCenter utilizes the most advanced state of the art flexible circuitry. This gives the InfoCenter it's elegant look and an extra wide viewing angle.

Other Unique Features

The InfoCenter is both UL and CE approved. It has an ample memory capacity that allows you to store up to 99 pages of information and holds up to 160 characters on each page. Your message can be programmed by a wireless mini keyboard or through the built in computer interface via RS232 or LAN. The user friendly software lets you begin programming in less than 5 minutes.

Quality

With over 23 years of experience in L.E.D. displays and hundreds of thousands of customers, Pro-Lite uses nothing but the highest rated electronics. With a 1.2 inch digit height L.E.D.'s, the brightly illuminated characters are visible up to 60 feet away. And the InfoCenter complies with ADA regulations.
